-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 16 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-11 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 4, and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Schneider, U.S. Patent No. 4,712,594.

Regarding Claims 1-2, 4, and 8-9, Schneider discloses a NBC water distribution system that can be disassembled and reassembled, be connected to any water source, and where the parts can be replaced.

Art Unit: 1723

Regarding Claim 7, Schneider discloses a flexible non-chemical resistant hose (#24).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneider.

Regarding Claim 6, Schneider discloses a chemically resistant material (Col. 11, Lines 43-45). It would have been obvious to one of ordinary skill in the art to modify the hose (#17) to be chemically resistant because it is in an environment where it is exposed to such toxins.

Regarding Claim 10, Schneider discloses a bulb siphon pump (#15) to transport water. It would have been obvious that the flexible canteen (#28) would be able to perform a similar function.

7. Claims 3, 5, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneider in view of Kirkpatrick, U.S. Patent No. 4,186,786.

Regarding Claims 3 and 11, Schneider discloses a storage container (#78) but does not disclose a storage bag. Kirkpatrick teaches a plastic bag (#10) that changes color when properly sealed (Col. 3, Lines 42-46). It would have been obvious to one of ordinary skill in the art to modify Schneider with the element of Kirkpatrick because it is a common means of

storage and in order to be able to visually determine that completeness of the occlusion (Col. 3, Lines 46-50).

Regarding Claim 5, duplication of parts has no patentable significance unless a new and unexpected result is produced. In re Harza, 274 F.2d 669, 124 USPQ 378 (CCPA 1960).
